PROFESSIONAL SOCIAL WORK: Social work grew out of humanitarian and democratic ideals, and its values are based on respect for the equality, worth, and dignity of all people. Since its beginnings over a century ago, social work practice has focused on meeting human needs and developing human potential. Human rights and social justice serve as the motivation and justification for social work action. In solidarity with those who are disadvantaged, the profession strives to alleviate poverty and to liberate vulnerable and oppressed people in order to promote social inclusion. Social work profession addresses the barriers, inequities and injustices that exist in society. Its mission is to help people to develop their full potential, enrich their lives, and prevent dysfunction.

Professional social work is focused on problem solving and change. As such, social workers are change agents in society and in the lives of the individuals, families and communities they serve. It responds to crises and emergencies as well as to everyday personal and social problems. Social work utilizes a variety of skills, techniques, and activities consistent with its holistic focus on persons and their environments. Social work interventions range from primarily person-focused psychosocial processes to involvement in social policy, planning and development.

The holistic focus of social work is universal, but the priorities of social work practice will vary from country to country and from time to time depending on cultural, historical, and socio-economic conditions. Social workers attempt to relieve and prevent hardship and suffering. They have a responsibility to help individuals, families, groups and communities through the provision and operation of appropriate services and by contributing to social planning
