

SOCIAL ENTREPRENEURSHIP

KEDARSINGH C. ROTELE
ROZA A. PARASHAR

The language of social entrepreneurship may be new, but the phenomenon is not. We have always had social entrepreneurs, even if we did not call them that. They originally built many of the institutions we now take for granted. However, the new name is important in that it implies a blurring of sector boundaries. In addition to innovative not-for-profit ventures, social entrepreneurship can include social purpose business ventures, such as for-profit community development banks, and hybrid organizations mixing not-for-profit and for-profit elements, such as homeless shelters that start businesses to train and employ their residents. The new language helps to broaden the playing field. Social entrepreneurs look for the most effective methods of serving their social missions.

Social entrepreneurship is the art of creating a socially responsible business that aims at generating profit, while solving social and environmental problems. A social entrepreneur starts and runs social enterprises. Social entrepreneurs find new and efficient ways to create products, services or structures that either directly cater to social needs or enable to cater to social needs that must be satisfied in order to achieve sustainable development.

Social entrepreneurship takes responsibility for an innovative and untested idea for positive social change and ushering that idea from dream to reality. It enables social entrepreneur to make lasting impact on the most difficult problems and it is a special combination of groundbreaking creativity and steadfast execution.

It is sincerely hoped that this book will be useful to all those who are interested in sustainable development of the society and country at large.

TRADE UNIONISM AND INDUSTRIAL RELATION

The lower half of the book cover features a black and white illustration of a group of people in silhouette. They are depicted in a protest or strike, with several individuals raising their fists in the air and holding up rectangular signs. The background of this illustration is a solid red color, which matches the top half of the cover. The overall design is bold and graphic.

**KEDARSINGH C. ROTELE
RITESH G. BAWANKAR**

In its thirteen chapters the authors have highlighted areas like trade unionism, industrial relations scenario and the existing practice of labour laws relating to working conditions, industrial relations, wage and salary administration, social security, etc. They have given more emphasis on major issues relating to industrial relation and trade unionism in the Indian Context.

The book is dedicated to describe the theoretical aspects of unionism while describing the meaning, concept, origin, objective, methods and activities of Indian trade along with their types, structures and federations in detail.

An attempt has been made to present the precise and up-to-date information about the topics covered in a very simple and logical manner. Adequate number of tables and exhibits have been incorporated in various chapters to make the book more interesting for the readers. The book would meet the requirements of the students of various courses like Industrial relations, Trade Union, Management, Business administration, commerce, Industrial Psychology, Social Work etc. and also be of great interest to the concerned academicians, researchers and professional managers."
